DETAILED ACTION

Election/Restrictions

Group I. Claim 1 through 16, drawn to a method for packaging, classified in class 438, subclass 25.

Group II. Claims 17 through 27, drawn to a packaging system, classified in class 257, subclass 684.

Inventions Group I and Group II are related as method and system for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the proposed method described in Group I can be done by an entirely different apparatus than that described by Group II..

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/086,050

Art Unit: 2812

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
